Safe Routes to Transit: Burleigh Street

W. Burleigh Street - N. Sherman Boulevard to N. 20th Street

PROJECT OVERVIEW

The City of Milwaukee Department of Public Works (DPW) is making improvements to W. Burleigh Street from N. Sherman Boulevard to N. 20th Street. The project is part of the Safe Routes to Transit program and will focus on making the street safer, more comfortable and more accessible for people walking and taking the bus.

Improvements include:

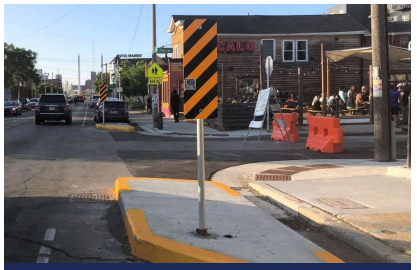

- **Bus bulbs** at 35th, 27th, 24th and 22nd streets
- **Bus stop relocations** at Sherman Boulevard and 27th Street
- **Detached curb extensions** at 41st, 39th , 37th, 35th, 30th, 25th and 24th streets
- **Pavement markings** throughout the corridor, including high visibility crosswalks

The project will also include a High Impact Paving overlay throughout the corridor that will extend east to W. Hopkins Street. Work consists of milling the existing road pavement, and overlaying with asphalt. Prior to the start of paving, utility work may occur and pedestrian ramps will be removed and rebuilt to meet Americans with Disabilities Act standards.

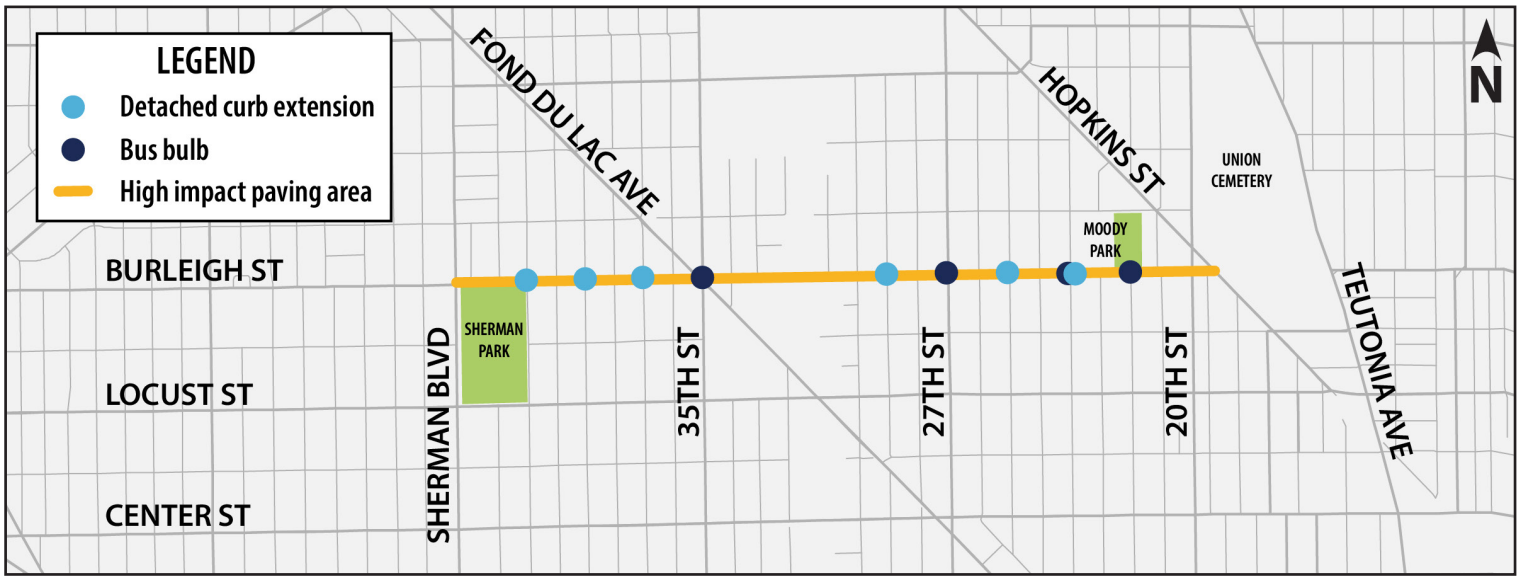

The project will also replace the traffic signal located at the intersection of N. 24th and Burleigh streets with all-way stop signs and detached curb extensions. The traffic signal will flash red until it is replaced with an all-way stop sign.

CONSTRUCTION IMPACTS

Construction for the project is anticipated to begin in spring 2025 and be completed in the 2025 construction season.

Two-way traffic will be maintained during a majority of the construction, with short-term lane closures and on-street parking restrictions throughout the project corridor expected.

During the high impact paving portion of construction, there will be day-long closures of traffic, in addition to no on-street parking. The project team will proactively communicate the paving schedule with residents and businesses along the corridor.
