W. Michigan Street - N. 10th to N. Water Street

Upcoming Traffic Safety Project

PROJECT OVERVIEW

The City of Milwaukee is redesigning W. Michigan Street from N. 10th Street to N. Water Street to improve safety, comfort, and accessibility for everyone using the street.

Improvements throughout the corridor include:

- Traffic calming through a **change in travel lanes** from 4 to 3
- One-way **concrete or parking-protected bike lanes** on both sides of the street
- **Pinned-on concrete bumpouts** at various intersections and midblock; some bumpouts will include plantings
- **Bus boarding islands** at NE corner of Plankinton Ave. and NE corner of Vel R. Phillips Ave. and **shared cycle track bus stop** at SW corner of Plankinton Ave.
- **Landscaped medians** and **pedestrian refuge islands** at various points throughout the corridor
- Pavement markings throughout the corridor, including **high-visibility crosswalks**

For a map of improvements, check out the **Updated Design Roll Plot** on the project website, **Engage.Milwaukee.Gov/Michigan-Street**.

CONSTRUCTION IMPACTS

Construction for the project is anticipated to begin in mid-July 2025 and be completed in the 2025 construction season.

Two-way traffic will be maintained during the majority of construction, with short-term lane closures and temporary, on-street parking restrictions throughout the project corridor expected.
