

W. Lisbon Avenue from W. Burleigh Street to N. 100th Street CONSTRUCTION FORECAST

October 2025

The City of Milwaukee is reconstructing W. Lisbon Avenue from N. 100th Street to W. Burleigh Street. During 2025, crews are expected to reconstruct the roadway between N. 100th and N. 86th streets. The following work is scheduled to take place over the next two weeks.

October 20 – October 31, 2025:

Eastbound N. 100th Street to N. 86th Street: CLOSED

Curb and gutter installation continues along W. Lisbon Avenue and cross streets.

Crews are expected to continue hand pouring concrete at side streets and intersections along W. Lisbon Avenue.

Upon the completion of paving operations, crews are scheduled to **saw-cut pavement joints**.

- This work is time sensitive and may continue overnight as the concrete cures

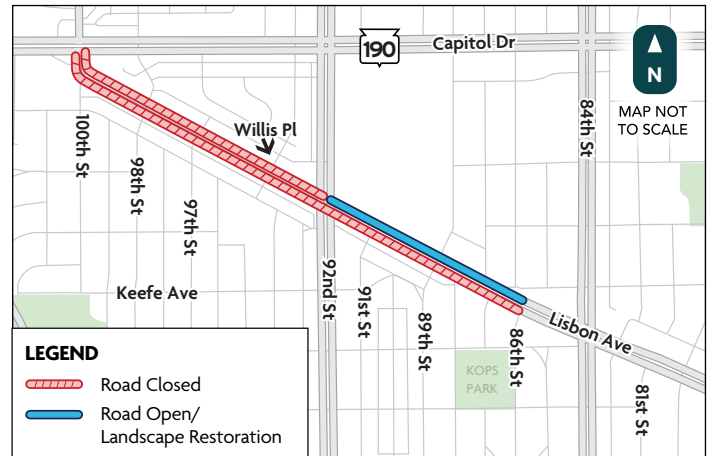

Residents and businesses should be aware that noise and dust will be associated with this work. Steps are taken to minimize these effects.

Westbound N. 92nd Street to N. 100th Street: CLOSED

Final concrete work is expected to begin following the completion of permeable paver installation.

Permeable pavers help drain water and filter contaminants from stormwater and snowmelt. By using porous materials, water travels all the way into the soil and gravel far below the concrete roadway, keeping water off city streets!

Permeable paver installation operations

Completed permeable paver installation

Westbound N. 86th Street to N. 92nd Street: OPEN

Landscape restoration efforts continue.

All work is weather dependent and subject to change.
