

PUBLIC INVOLVEMENT MEETING

North 25th Street Bridge Rehabilitation Project

The City of Milwaukee is proposing improvements for the N. 25th Street Bridge over the Menomonee River. This meeting is an opportunity for people living, working and traveling near the N. 25th Street Bridge to learn about the proposed project and share input on the roadway and its future improvements.

Meeting Format:

This meeting will be held in an open-house format. Members from the project team will be available to answer any questions and walk attendees through design proposals. Display boards will be set up around the pavilion detailing construction staging and potential timeline information. There will be no formal presentation.

Comment forms will be provided, and the project team will collect and record all submissions.

Examples of the type of input we are seeking:

- What access concerns do you have during construction?
- What business concerns do you have during construction?
- What travel concerns do you have during construction?

Proposed Rehabilitation Plans:

The 25th Street Bridge, built 45 years ago, has deteriorated over time and is now considered structurally deficient, particularly in its deck and superstructure. This proposal aims to address these concerns and improve the bridge for the community.

The proposed work consists of:

- Concrete surface repair to the substructure.
- Concrete repairs and overlay to the deck.
- Concrete surface repairs to the sidewalk, curb and parapets.
- Installation of new expansion joints.

Construction could begin as early as 2027, during which the bridge will be closed to all traffic, with a dedicated detour route posted for both motorists and pedestrians. The project team will continue to keep the public informed of updates throughout the project.
