

# CONSTRUCTION FORECAST

W. Lisbon Avenue from N. 100th St. to W. Burleigh St.

JUNE 2026

## CONSTRUCTION FORECAST FOR THE WEEK OF JUNE 15, 2026

The City of Milwaukee is reconstructing W. Lisbon Avenue between N. 100th Street and W. Burleigh Street. In 2026, crews are reconstructing the street between N. 86th and W. Burleigh streets. The following work is scheduled to take place.

### Westbound N. 86th Street to W. Burleigh Street:

#### The week of June 15, 2026:

Crews are scheduled to continue hand pouring concrete at side streets and driveway approaches in the westbound lane.

Protected bike lane installation is scheduled to begin.

*All work and schedules are weather dependent and subject to change.*

#### Looking Ahead:

Once concrete and bike path installation are completed, crews will begin permeable paver installation and landscape restoration efforts. This includes building bioswales to improve storm water drainage, grading topsoil, and laying fresh sod.

### N. 100th Street to N. 86th Street:

Landscape restoration between N. 100th Street and N. 86th Street has been completed. Southeastern Wisconsin experienced a moderate drought following a historic lack of rainfall in May. Crews continue to water freshly planted sod and trees along the street, and residents are encouraged to water as they are able to assist with the development and longevity of the new vegetation.

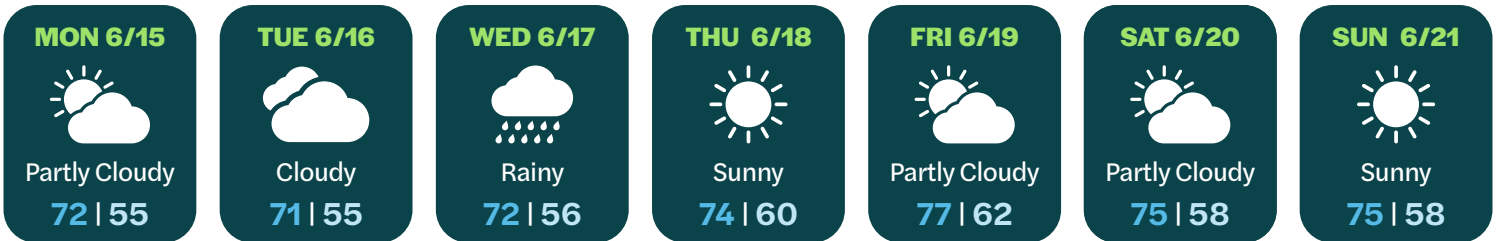

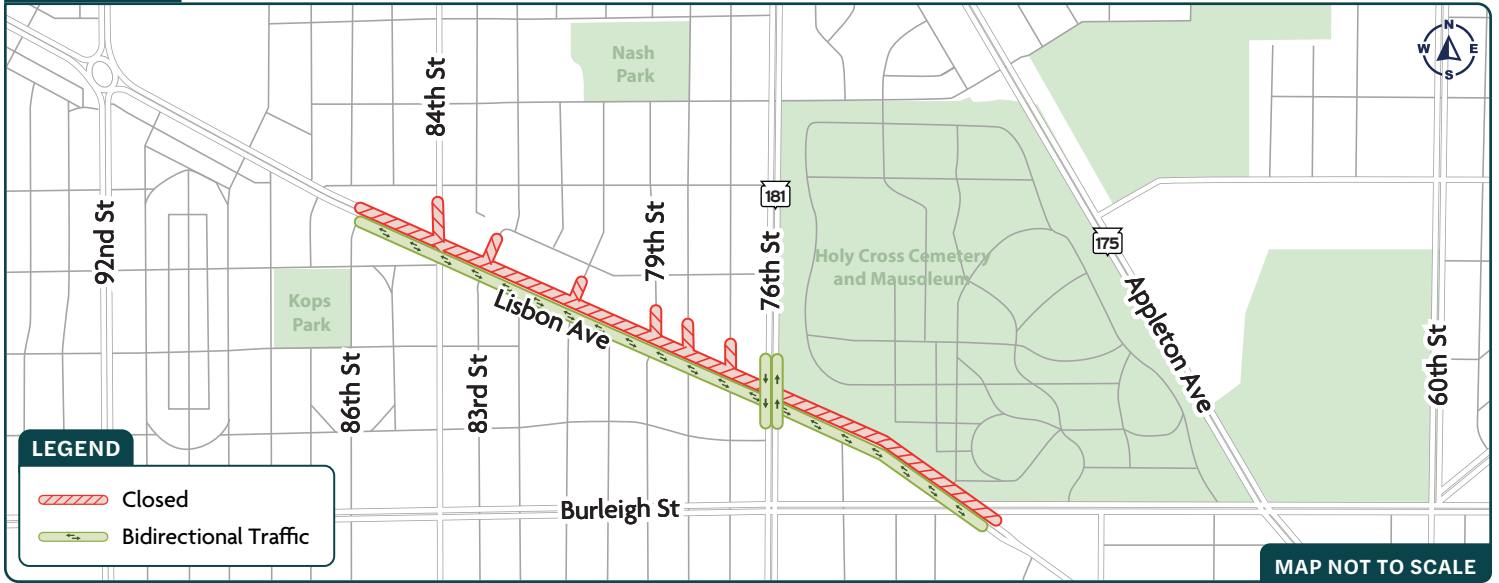

Businesses and residents are reminded that they are responsible for cutting the grass on curb extensions and between the curb and protected bike lane.

*Hand-pouring concrete on W. Lisbon Avenue.*
