WIS 32 Pavement Replacement Project
One-Way Raised Bike Lane (Leading Alternative, Prospect 2B and Farwell 2B)
Prospect Ave, Farwell Ave, and Bradford Ave: from Wells St to Lake Dr

City of Milwaukee | Department of Public Works | Wisconsin Department of Transportation

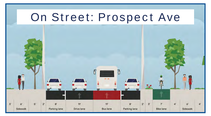

Legend
- Parking Lane
- Raised Bike Lane
- Bus Lane
- Traffic Signal Replacement

- Sidewalks to remain in the same location
- Curb ramps to be updated

High Visibility Crosswalks

High visibility crosswalk markings are wide and bright crosswalk markings.

High visibility crosswalks can:
- Warn motorists of pedestrian crossings
- Make pedestrians more visible

Raised Crosswalks

A raised crosswalk is where the intersection crosswalk surface is elevated from the adjacent roadway and is at sidewalk level.

Raised crosswalks can:
- Reinforce slow speeds
- Encourage motorists to yield to pedestrians at the crosswalk

Bus Boarding Platforms

Enhanced bus boarding platforms are detached concrete islands at bus stops.

Enhanced bus boarding platforms can:
- Improve bicyclist and pedestrian safety
- Improve bus operations

Raised Bike Lanes

Raised bike lanes are sidewalk-level bike lanes that provide a dedicated space for people biking.

Raised bike lanes can:
- Separate cyclists from motor vehicle traffic
- Improve cyclist's comfort and visibility
- Reduce conflicts between people biking and driving

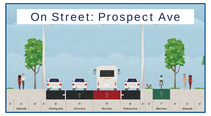

Bump Outs

Bump outs are concrete elements that extends the curb into the parking lane. They can be "pinned-on" or "attached" to the curb.

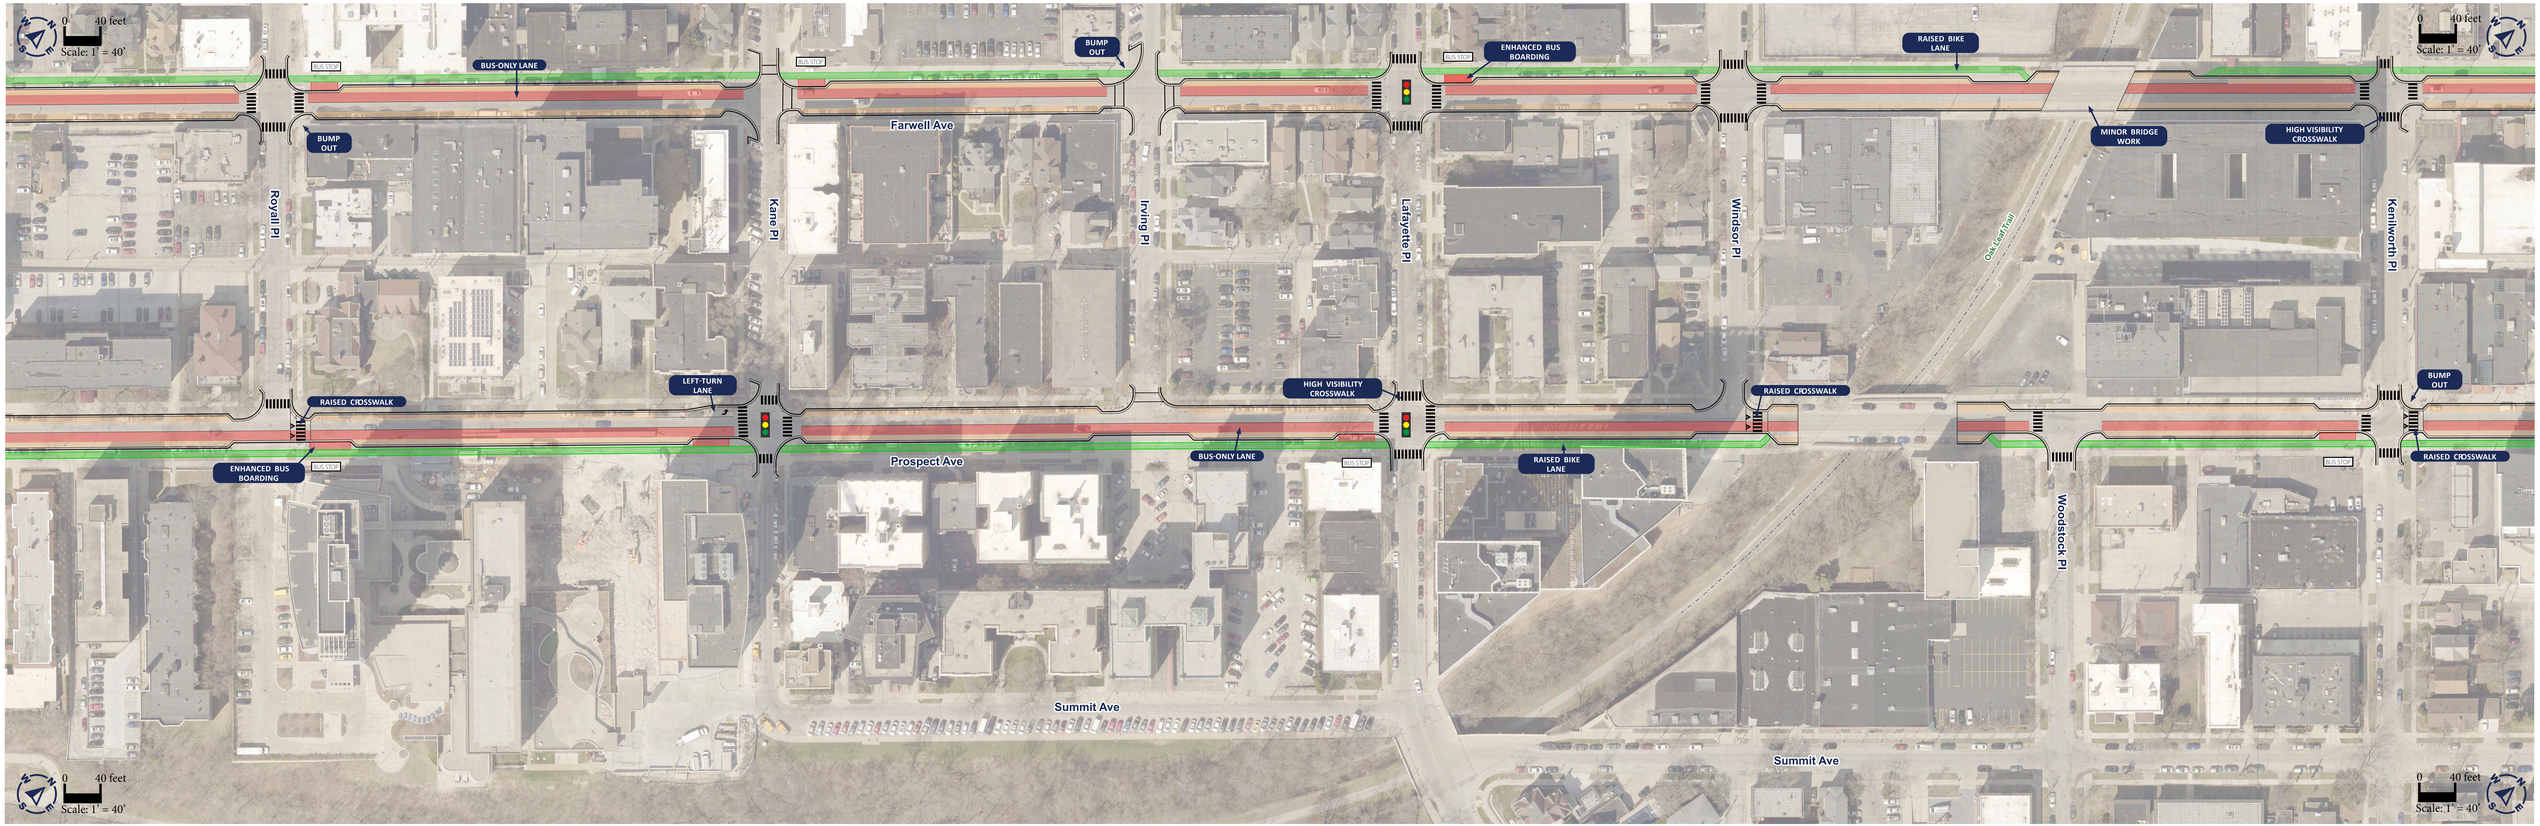

Bump outs can:
- Encourage slower turning
- Shorten crossing distances and increase pedestrian visibility
- Prevent dangerous passing on the right

Bus boarding platforms can:
- Improve bicyclist and pedestrian safety
- Reduce bicyclist conflicts with motor vehicle traffic

Raised Bike Lanes

Raised bike lanes are sidewalk-level bike lanes that provide a dedicated space for people biking.

Raised bike lanes can:
- Provide a buffer from motor vehicle traffic
- Help keep snow cleared
- Reduce conflicts between people biking and driving

Bump Outs

Bump outs are concrete elements that extends the curb into the parking lane. They can be "pinned-on" or "attached" to the curb.

Bump outs can:
- Improve bicyclist safety
- Shorten crossing distances and increase pedestrian visibility
