W. Michigan Street - N. 10th to N. Water Street

Project Update - August 2025

PROJECT UPDATE

The City of Milwaukee is redesigning W. Michigan Street from N. 10th Street to N. Water Street to improve safety, comfort, and accessibility for everyone using the street.

Construction on the project is underway and crews have poured concrete for pedestrian refuge islands and landscaped medians at various points throughout the corridor. Asphalt patching has also taken place at various places throughout the project area.

Beginning **Wednesday, August 27**, two-way traffic will move from the exterior lanes to the interior lanes to allow crews to begin work on sawcutting and removals for the pinned-on concrete bumpouts and bus boarding islands throughout the project area.

For a map of improvements, check out the **Updated Design Roll Plot** on the project website, **Engage.Milwaukee.Gov/Michigan-Street**.

Concrete for landscaped median poured west of N. 3rd Street

Concrete for landscaped median poured between N. 2nd Street and N. Plankinton Ave.

CONSTRUCTION IMPACTS

Beginning **Wednesday, August 27**, two-way traffic will be maintained on the interior lanes as work begins in the exterior lanes along the curb. People driving through the work zone should **expect slower speeds** as driving lane widths will be narrow. There will be **no on-street parking** on W. Michigan Street from N. 10th to N. Water Street. Access to all businesses, residences and parking structures will be maintained.
