PROJECT UPDATE

Holton Street Bridge Rehabilitation Project

The City of Milwaukee is rehabilitating the N. Holton Street Bridge from E. Reservoir/Glover avenues to just north of Brady Street. Periodic roadway closures will be required in 2025, including a full closure of the Holton Street Bridge later this year.

Beginning Tuesday, May 20, 2025:

The two-way protected bike lane and sidewalk on the east side of the Holton Street Bridge are scheduled to close until fall 2025.

Bidirectional motorist traffic on N. Holton Street will be maintained.

Alternate Routes

- Northbound cyclists are encouraged to use the Marsupial Bridge under the Holton Street Bridge and the Beerline Trail to get around the closure.
- Pedestrians and southbound cyclists are encouraged to use the sidewalk and bike lane on the west side of the Holton Street Bridge to get around the closure.

Access to residences and businesses will be maintained.

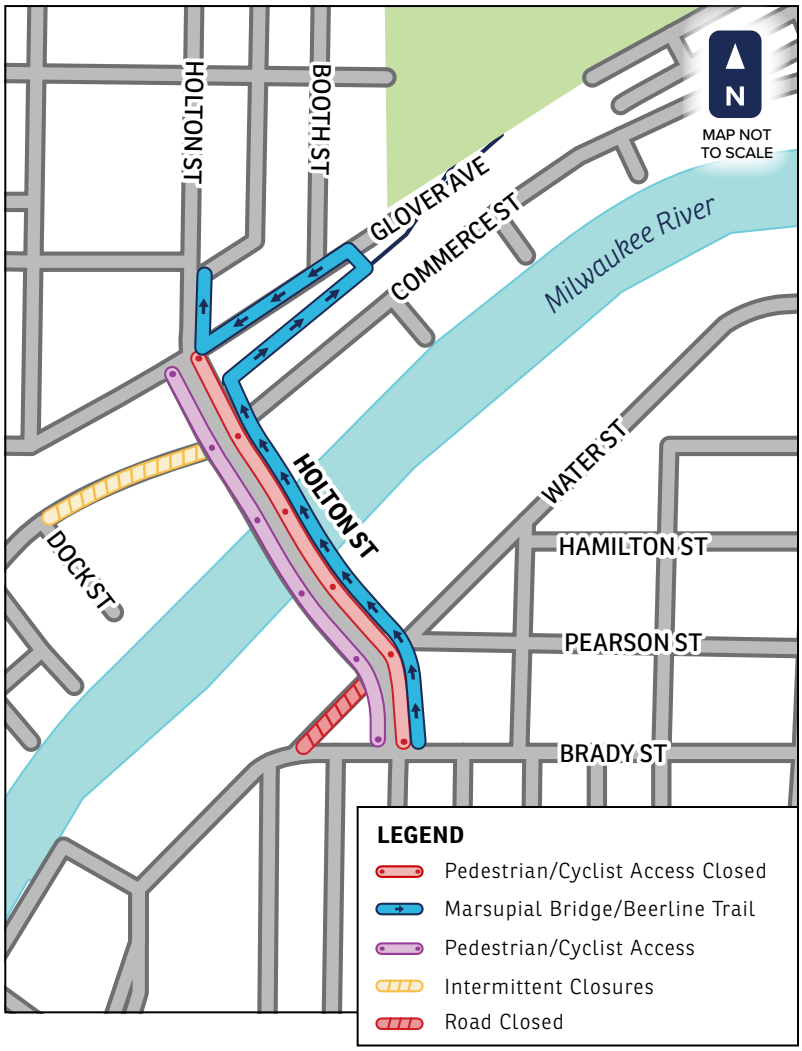

Closure Reminders

N. Water Street, between E. Brady Street and E. Pearson Street, will remain closed to traffic through late spring for safe painting operations on the Holton Street Bridge.

N. Commerce Street, between E. Dock Street and N. Holton Street, may have periodic road closures from 9 a.m. until 3 p.m. for the safe removal and replacement of structural steel.

The Marsupial Bridge, located under the Holton Street Bridge, may have short-term daytime closures the week of May 19, 2025.

All work is weather dependent and subject to change.
