W. Michigan Street - N. 10th to N. Water Street

Project Update - September 2025

PROJECT UPDATE

The City of Milwaukee is redesigning W. Michigan Street from N. 10th Street to N. Water Street to improve safety, comfort, and accessibility for everyone using the street.

Beginning **Tuesday, September 9**:

- Crews will begin pouring concrete for the pinned-on concrete bumpouts and landscaped islands along the curb throughout the project area.
- Concrete pours will begin on the west end of the project and move east.

In order to maintain a safe workzone, **crews will be implementing short-term closures of one (1) block where concrete is being poured.** The block will be reopened when the concrete pour is complete.

Motorized vehicle and bicycle traffic will be detoured one (1) block; MCTS bus traffic and pedestrian access will be maintained. Access to all businesses and parking structures will be maintained.

Concrete pours and the associated short-term block closures are expected to take place on weekdays through Friday, September 19.

Schedule is weather dependent and subject to change.

For a map of improvements, please view the **Updated Design Roll Plot** on the project website, **Engage.Milwaukee.Gov/Michigan-Street**.

Concrete for landscaped median poured west of N. 3rd Street

Concrete for landscaped median poured between N. 2nd Street and N. Plankinton Ave.
