S. Kinnickinnic Avenue - E. Holt Avenue and S. Fulton Street

Traffic Safety Project

November 2025

Project Overview

The City of Milwaukee - Department of Public Works (DPW) is making improvements to S. Kinnickinnic Avenue (STH 32) between E. Holt Avenue and S. Fulton Street to reduce speeding and curb reckless driving.

The project is in the design phase and the earliest anticipated construction is 2026.

Throughout the summer, DPW engineers and field survey crews have been onsite gathering information on the existing conditions of the street, such as geometry, elevations and utility locations to aide in preparation of design plans for traffic calming improvements.

Below is a map of the preliminary design and proposed treatments. Please share your feedback on the design with staff present at tonight's meeting or using the physical or digital comment form!

Preliminary Design

Map and placement of treatments are not to scale.
