PROJECT UPDATE

Holton Street Bridge Rehabilitation Project

The City of Milwaukee is rehabilitating the N. Holton Street Bridge from E. Reservoir/Glover avenues to just north of Brady Street. The following work is scheduled to take place as part of this project.

The week of Monday, September 15, 2025:

N. Holton Street, between E. Reservoir/Glover avenues to just north of Brady Street, is scheduled to close to all motorist and pedestrian traffic for approximately one week while crews continue bridge rehabilitation efforts.

The week of Monday, September 22, 2025:

N. Water Street, between E. Brady and E. Pearson streets, is scheduled to close for approximately one week for steel repairs over the roadway.

Alternate Routes:

- → Motorists are encouraged to use E. Pleasant Street or N. Humboldt Avenue to cross the Milwaukee River during this work
- → Cyclists and pedestrians are encouraged to use the Marsupial Bridge, located under the N. Holton Street Bridge, to get around the Holton Street closure

Work is expected to begin at approximately 7 a.m. daily, Monday through Saturday.

Residents and businesses should be aware that noise and dust will be associated with this work. Steps are taken to minimize these effects.

An additional full closure of N. Holton Street is scheduled for multiple weeks in late fall 2025.

All work is weather dependent and subject to change.
