PROJECT UPDATE

Holton Street Bridge Rehabilitation Project

ROAD CLOSURE

The City of Milwaukee is rehabilitating the Holton Street Bridge from E. Reservoir/Glover avenues to just north of Brady Street. Periodic roadway closures will be required in 2025, including a full closure of the Holton Street Bridge later this year.

The following work is scheduled to begin Monday, April 28, and continue for the next several weeks:

- N. Water Street, between E. Brady Street and E. Pearson Street, is scheduled to close to traffic through late spring for safe painting operations on the Holton Street Bridge.
- N. Commerce Street, between E. Dock Street and N. Holton Street, will remain closed to traffic weekdays from 9 a.m. until 3 p.m. for the safe removal and replacement of structural steel.

These closures are necessary to facilitate work on the bridge structure and ensure the safety of travelers.

Alternate Routes

» Motorists are encouraged to use E. Pleasant Street, E. Brady Street and N. Humboldt Avenue to get around the closure.

» Pedestrians and cyclists are encouraged to use E. Brady Street to get around the closure.

The Marsupial Bridge will remain open and accessible from both ends during the Water Street closure.

Access to residences and businesses will be maintained.

All work is weather dependent and subject to change.
