Safe Routes to Transit: Burleigh Street

W. Burleigh Street - N. Sherman Boulevard to N. 20th Street

Construction Progress

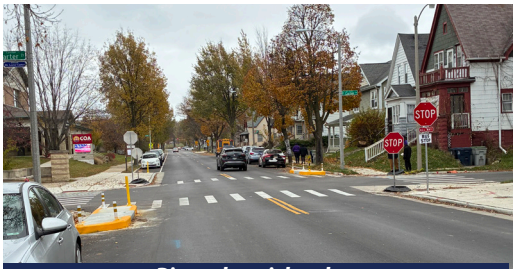

The City of Milwaukee Department of Public Works (DPW) has finished making improvements to W. Burleigh Street from N. Sherman Boulevard to N. 20th Street.

The project was part of the Safe Routes to Transit program and focused on making the street safer, more comfortable and accessible for people walking and taking the bus.

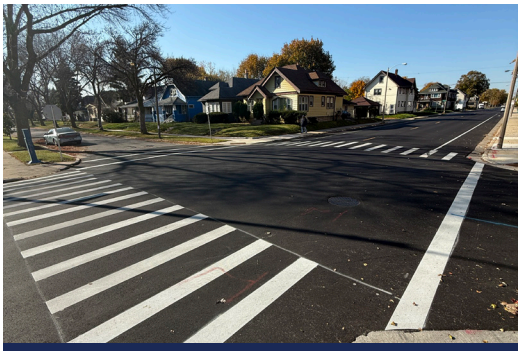

Throughout the project, the following improvements were made:

- **Bus bulbs** were added on the north side of the street at 35th, 27th and 22nd streets; and on the south side of the street at 35th, 24th and 22nd streets
  - **Impact:** Bus bulbs keep buses in the travel lane for boarding, cutting merge delays and improving speed and reliability.
- **Pedestrian ramps** were rebuilt to meet ADA standards
- **High Impact Paving** overlay throughout the corridor that extends east to W. Hopkins Street
- **Pavement markings** throughout the corridor, including high visibility crosswalks
  - **Impact:** High visibility crosswalks use patterns and paint that are visible to both people walking and driving from further away to increase yielding behavior.
- **Pinned-on islands** installed at 41st, 39th, 37th, 35th, 30th, 25th and 24th (Dr. Lester Carter Drive) streets
  - **Impact:** Pinned-on islands physically and visually narrow the street, creating safer and shorter crossing distances.

"No Parking" restrictions on the street have been lifted. The project team thanks you for your patience and cooperation!
