

16th Street Bridge over the Menomonee River

Bridge Rehabilitation

Project Update - December 2025

PROJECT UPDATE

During an in-depth inspection conducted today, Thursday, December 4, a bridge element on the 16th Street Viaduct was determined to require further evaluation and possible repairs, which requires the bridge to be closed to traffic.

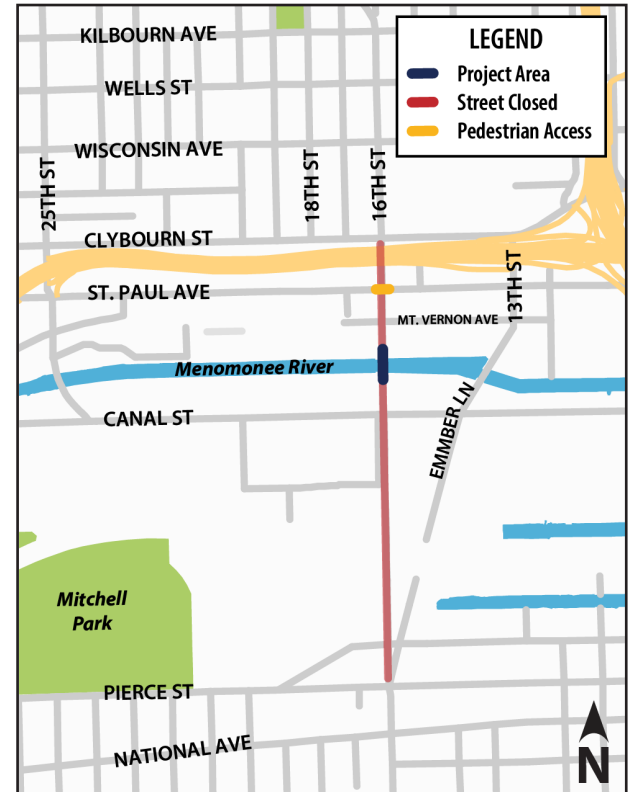

Because this element is located south of the viaduct ramp, the entire bridge must be closed.

The northern portion of the 16th Street Viaduct over the Menomonee River was already closed as part of the ongoing bridge rehabilitation project between Canal Street and Clybourn Street.

The closure will be implemented at 16th Street and Pierce Street, and at the bottom of the viaduct ramp. Pierce Street will remain accessible to traffic.

The closure is expected to be in place by the morning rush hour tomorrow, Friday, December 5.
