PROJECT UPDATE

The City of Milwaukee is rehabilitating the E. Cherry Street Bridge over the Milwaukee River. The following work is scheduled to take place as part of this project.

Beginning Monday, December 8, 2025:

Paint removal operations are scheduled to begin on the E. Cherry Street Bridge over the Milwaukee River.

- Crews are scheduled to continue rivet removal, remove existing paint and repaint the bridge structure in several phases
- A containment system will be installed under the E. Cherry Street Bridge prior to work taking place
- Paint removal is scheduled to take place Monday through Saturday from 7 a.m. to 7 p.m., through mid-January
- **Residents and businesses should be aware that loud noise is associated with this work**

Ongoing work on the E. Cherry Street Bridge includes additional repairs discovered after construction began, which are necessary for long-term safety and reliability. These added improvements extend the project timeline, with completion now anticipated in late 2026.

Example debris containment system installed for paint removal

All work is weather dependent and subject to change.
