

DESIGN OVERVIEW

Center-Teutonia Multimodal Improvements

OCTOBER 2026

About the Project

The City of Milwaukee is working on a project to improve safety and mobility for people walking, biking, taking the bus, and driving along E./W. Center Street from N. Humboldt Boulevard to N. Teutonia Avenue, and N. Teutonia Avenue from W. Center Street to W. Locust Street.

Project Goals

Design the street to reduce the risk of severe crashes

Improve street crossings and access to key community resources, such as schools, churches, and local businesses

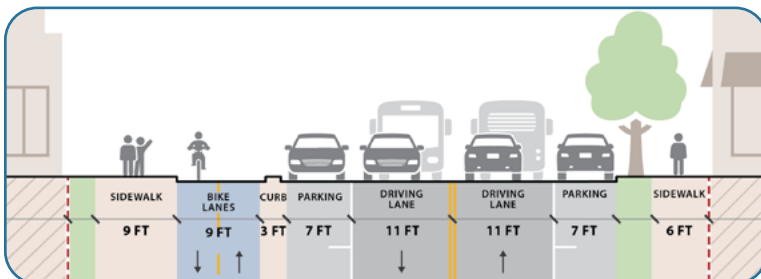

Connect neighborhoods to a growing citywide network of bike routes for people of all ages and abilities

Improve access to bus stops and efficiency of bus boarding along the corridor

Design Snapshot

- Reorient street layout, replacing unprotected bike lanes with a two-way concrete and parking protected bikeway
- Add two new raised crosswalks and four new all way stops along W. Center Street adjacent to schools
- Improve bus stop locations and operations throughout corridor, adding bus boarding islands

Example Cross Section (facing East on W. Center Street)
