

Walker's Point Neighborhood (and nearby) Traffic Calming Projects

This map includes recently completed and confirmed upcoming traffic calming projects in and around Walker's Point. It does not include any Neighborhood Traffic Management Projects or projects that are still tentative.

KK River Trail Connections
Protected Bikeway (2024)

National Avenue (STH 59)
Reconstruction (2026-2028)

6th Street/Mineral Street
Intersection Improvements
(Completed – 2022)

Washington Street/Scott Street
Bike Boulevard (2024)

Cesar E. Chavez Drive
Intersection Improvements
(2022, 2024, and 2026)

1st Street (STH 32)
Reconstruction (2028-2029)

Project Details:

- **6th Street/Mineral Street:** Infrastructure treatments to slow vehicle speeds and decrease pedestrian crossing distances
- **Washington Street/Scott Street:** Infrastructure treatments to slow vehicle speeds to be similar to people biking
- **KK River Trail Connections:** Protected bikeway infrastructure and traffic calming treatments to connect the KK River Trail, Hank Aaron State Trail, and Oak Leaf Trail
- **Cesar E. Chavez Drive:** Intersection treatments (three different projects) to reduce reckless driving and prioritize transit
- **National Avenue:** Full street reconstruction that will reduce driving lanes from four to two, reduce pedestrian crossing distances, and add a protected bikeway
- **1st Street:** Full reconstruction project, design changes to be determined
